## MAGNETIC LIFTING SYSTEM

YUNEL®

SET A PRECEDENT FOR METAL LIFTING AND CONVEYING TECHNOLOGIES

FINAL DESTINATION FOR LIFTING STEEL SHEETS,  
PROFILES AND VARIOUS METALLIC PARTS

### APPLICATIONS

- Stacking Steel Sheets and profiles
- Feeding sheet and profiles to shears and punch presses
- Loading sheet and profiles to press brakes and burn tables
- Moving sheets and profiles from pallets or racks
- Loading / Unloading saws, cutting stations, welding cells and plates
- And other lifting, unloading and loading applications

### ADVANTAGES

- Lifting of materials in different shape and structure with one system.
- Superior than electromagnetic lifting systems with very strong permanent magnetic circuit design.
- No need to electrical energy therefore operates in continuous manner without being affected by energy cut.
- No need for battery backup
- More secure in operation than electromagnetic systems, no need for maintenance and repair. It is a permanent magnetic circuit with infinite life.
- Only requires shop air for releasing the metallic parts. It won't drop load due to power outages and system air loss.
- Special manufacturing and customization are available for desired lifting capacities.
