# MODEL KBT CONVEYOR BELT CLEANER

The Model KBT cleaner effectively cleans any type material, wet, dry or sticky from conveyor belts. Spring and blade life are greatly increased by the exclusive floating spring design. Thus, the cleaner pays for itself many times over by reducing clean-up and cleaner maintenance expenses. Idler build up and belt misalignment are also eliminated. Cleaners are shipped assembled and ready to install and will adjust easily to fit any size conveyor frame.

The Model KBT definitely will not harm metal belt splices. It is designed for use on belts with either mechanical or vulcanized splices!

## QUICK-CHANGE ACTION

The design of the Model KBT cleaner is such that maintenance can be performed quickly and with very little effort. The entire blade arm and angle assembly together with the adjusting handle can be withdrawn from underneath the belt of through a door in the chute for quick maintenance to the arm and blade assembly. This is accomplished by loosening the locking handle which permits the entire assembly to slide off the support pipe.

## HOW "FLOAT ACTION" WORKS

A "sandwich" is constructed from two pads of high quality rubber. Our spring arm is then allowed to "float" between them. Two bolts through the rubber and arm clamp the assembly securely to the spring support angle. The rubber then absorbs the majority of the spring's flexing thereby increasing its life. Spring arm construction is of the highest quality, specially processed spring steel.

# MODEL KBT CONVEYOR BELT CLEANER

With Exclusive "Float Action" springs

SAVE ON CLEAN-UP EXPENSE

NEW SPRING DESIGN GREATLY INCREASES SPRING AND BLADE LIFE

STOPS BELT RUN-OFF ELIMINATES BUILD-UP ON RETURN IDLERS

EASY TO INSTALL

AVAILABLE FOR ANY SIZE BELT

EXTENDS BELT LIFE

INEXPENSIVE

REMOVES WET, DRY OR STICKY MATERIALS
